TO THE

MATHEMATICAL GAZETTE

No. 242, FEBRUARY, 1937—No. 247, DECEMBER, 1937.

COMPILED BY MRS. T. A. A. BROADBENT.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. The Pillory.
7. The Library.
8. Correspondence.
9. Miscellaneous.

ARTICLES, ETC.

AUTHOR.	TITLE.	PAGE.
A. C. Aitken.	Trial and error and approximation in arithmetic.	117
M. S. Bartlett.	"Natural" mathematics.	44
M. Black.	Some linguistic aspects of mathematical teaching.	365
F. C. Boon.	The solution of equations by the use of proportional differences.	182
T. A. A. Broadbent.	*See* British Association Discussions.	
J. Clemow.	Invariants and covariants of three conics.	401
J. Devisme.	English and French teaching methods compared.	123
G. A. Dickinson.	Wallis's product for $\pi/2$.	135
W. J. Dobbs.	A simple geometrical device, and some of its applications.	203
I. M. H. Etherington.		
	Non-associate powers and a functional equation.	36
	Postscript.	153
W. Fabian.	Fractional calculus.	216
	Expansions by means of the fractional calculus.	396

AUTHOR.	TITLE.	PAGE.
A. R. Forsyth.	Presidential Address, 1937. Applied mathematics in school training : some general considerations.	8
C. H. H. Franklin.	Hypersolid concepts, and the completeness of things and phenomena.	360
J. B. Freeman.	The conjugate hyperbola and the involutory ellipse.	384
R. M. Gabriel.	The history of mathematics : its relation to pupil and teacher.	106
	Discussion : A. W. Siddons (p. 113) ; Sir Thomas Heath (p. 114) ; G. L. Parsons (p. 115) ; M. Black (p. 116) ; E. H. Neville (p. 116) ; R. M. Gabriel (p. 116).	
N. M. Gibbins.	Logarithms by interpolation.	177
R. Goormaghtigh.	On certain related curves.	256
G. H. Grattan-Guinness.	"A weighty matter."	140
H. G. Green.	*See* British Association Discussions.	
C. E. Gwyther.	*See* A. Russell.	
E. E. Ironmonger.	A method of teaching.	271
R. R. Kuczynski.	Population trends.	99
	Discussion : W. Hope-Jones (p. 104) ; E. H. Neville (p. 104) ; D. White (p. 104) ; A. W. Siddons (p. 105).	
W. J. Langford.	*See* British Association Discussions.	
J. G. Leadbeater.	Indirect proof in geometry.	25
G. Loria.	Teaching the history of mathematics.	274
H. V. Lowry.	The Board of Education summer school for teachers of mathematics in technical colleges, July 1936.	40
E. A. Maxwell.	On certain transformations in euclidean spaces.	46
W. H. McCrea.	*See* British Association Discussions.	
E. H. Neville.	*See* British Association Discussions.	
M. H. A. Newman.	*See* British Association Discussions.	
G. L. Parsons.	*See* British Association Discussions.	
D. Pedoe.	On the representation of circles by means of points in space of three dimensions.	210
H. T. H. Piaggio.	Fallacies concerning averages.	369
	See also British Association Discussions.	
F. B. Pidduck.	The reform of mathematics.	249
A. Narasinga Rao.	On homogeneous coordinates.	371
R. T. Robinson.	Theorems on the tetrahedron.	188
H. S. Ruse.	*See* British Association Discussions.	
A. Russell and C. E. Gwyther.	The partition of cubes.	33
F. G. Skrine.	Practical plane and solid geometry.	376
C. N. Srinivasiengar.	On singularities of plane curves given by parametric equations.	276
G. Temple.	The theory of complex numbers.	220
G. Wolff.	The development of the teaching of geometry in Germany.	82
Annual Meeting of the Mathematical Association, 1937.		1
Report of the Council for 1936.		3

PAGE.

The Library. Two Bookplates. 6

Report on mathematical films. 149

The teaching of elementary astronomy. 259

Discussion :

J. A. Edgar (p. 259) ; L. E. Lefevre (p. 261) ; R. L. Marshall (p. 264) ; A. W. Siddons (p. 267) ; W. F. Bushell (p. 267) ; A. W. Siddons (p. 268) ; J. A. Edgar (p. 269) ; R. L. Marshall (p. 270) ; L. E. Lefevre (p. 270).

Mathematics at the British Association, 1937. 270

British Association, Section A, 1937. 313

British Association Discussions, 1937.

The unification of algebra in schools. (Chairman, E. H. Neville.) 314

T. A. A. Broadbent. An introductory survey of the present situation. 314

G. L. Parsons. The introduction of the fundamental ideas of algebra. 317

M. H. A. Newman. The course as seen from the University. 325

W. J. Langford. The teaching of algebra in the advanced forms of schools. 329

The bearing of higher geometry on the school course. (Chairman, H. T. H. Piaggio.) 338

E. H. Neville. The influence of the university on school geometry. 339

H. G. Green. Infinity in euclidean geometry. 343

W. H. McCrea. The circular points and elementary geometry. 346

H. S. Ruse. Differential geometry. 352

MATHEMATICAL NOTES.

Author.	No.	Title.	Page.
N. Altshiller-Court.	1228	A group of coaxial spheres.	57
D. Arany.	1266	Note on the three-cusped hypocycloid.	418
A. A. Krishnaswami Ayyangar.	1229	Queer alternatives.	58
	1230	Euclid XI, 4.	59
J. E. Blamey.	1246	A proof of an elementary theorem in geometry.	231
R. H. Blomfield.	1236	A property of the triangle.	158
F. C. Boon.	1263	To sum the cubes of the natural numbers by the use of gnomons.	414
	1264	On Note 1231.	415
J. Clemow.	1245	A note on $x^2+y^2=N$.	230
	1251	Note on division.	289
J. T. Combridge.	1224	The "ambiguous case" in the solution of triangles.	54
V. R. Coles.	1241	The solution of a cubic equation.	164
R. H. Dick.	1222	On Note 1201.	54
J. H. Doughty.	1250	On relative velocity.	285
C. V. Durell.	*See* A. Robson.		
M. F. Egan.	1257	The power-series for sin x and cos x.	409

Author.	No.	Title.	Page.
W. E. Egner.	1242	Note on integration.	226
E. B. Escott.	1253	A method of division.	290
D. F. Ferguson.	1265	Triangles with integral sides and area.	416
N. M. Gibbins.	1267	A well-known invariant.	418
R. Goormaghtigh.	1276	On a cubic diophantine equation.	427
H. N. Haskell.	1234	Feuerbach's theorem.	154
H. A. Hayden.	1240	The differential operator $\left(x\frac{d}{dx}\right)^{-1}$.	163
W. Hunter.	1227	The representation of numbers as the sum of cubes.	56
C. D. Langford.	1252	Note on the teaching of Fletcher-Jones division.	289
B. E. Lawrence.	1238	Note on focus sharing conics.	160
	1248	To draw the square of which a given parallelogram is the orthogonal projection.	283
E. P. Lewis.	1232	On Note 1187.	60
N. W. McLachlan.	1244	A note on Bessel's function of order zero.	229
C. D. Mathews.	1269	The indirect proof.	420
L. M. Milne-Thomson.			
	1243	On the relation of an analytic function of z to its real and imaginary parts.	228
E. H. Neville.	1225	Addition to Note 1209.	55
	1226	The focus-sharing conics again.	56
	1237	A theorem on three conics derived from a conic and a triangle.	159
H. Orfeur.	1249	The biquadratic equation.	285
	1258	A suggestion.	409
W. H. Osborne.	1235	Some remarks on the coefficient of restitution.	155
L. R. Pears.	1270	A problem in algebra.	421
M. A. Porter.	1255	American tournaments.	295
C. T. Rajagopal.	1239	A necessary and sufficient condition for the convergence of certain series.	161
A. Narasinga Rao.	1256	On the converse of a theorem in elementary geometry.	408
E. M. Read.	1268	An experiment.	419
A. Robson and C. V. Durell.			
	1223	Differentials.	54
A. P. Rollett.	1260	The factors of 11 . . . 11, etc.	410
	1261	A curious rectangle.	412
	1262	Simple methods for S_1, S_2, S_3. $(S_p = \sum_1^n r^p)$.	412
D. N. Sen.	1273	Roots of a certain continuant.	425
B. A. Swinden.	1274	An exercise in elementary geometry.	426
	1275	The partition of cubes.	426
V. Thébault.	1220	Sur le triangle isoscèle.	52
	1272	Curiosités arithmétiques.	424
W. J. Thompson.	1247	A proof of Euclid XI, 4.	283
J. Todd.	1271	A theorem in arithmetic.	423
F. J. Tongue.	1233	A proof of the formula $\rho = r\,dr/dp$.	154

AUTHOR.	NO.	TITLE.	PAGE.
C. O. Tuckey.	1221	Medial section.	53
	1231	Trigonometrical note.	60
	1259	Why all this fuss?	410
G. N. Watson.	1254	Comments on Note 1225.	292
